TECHNICAL DATA

Homerunner II®

Model 6010-15

for Corning® 2000 PTD® type NID's

Description

The TDI model 6010-15 is a multi-pair connection block which allows as many as fifteen home run pairs to be connected to a single incoming wire pair. Fits the Corning® 2000 series PTD® type NID's. Can be used singly, or in as many positions as are available. Can be jumpered between blocks to allow almost unlimited pair connection.

Features

- Color coded screw terminals
- Each screw will accommodate up to three wires
- Molded from tough 94V-0 ABS
- Easily connected in multiples for high pair count termination
- Simple to install
- Packaged in cartons of 10 units

Configurations

This product can be supplied with a number of different continuity configurations. The standard unit uses a brass buss bar to connect all the tip screws and all the ring screws.

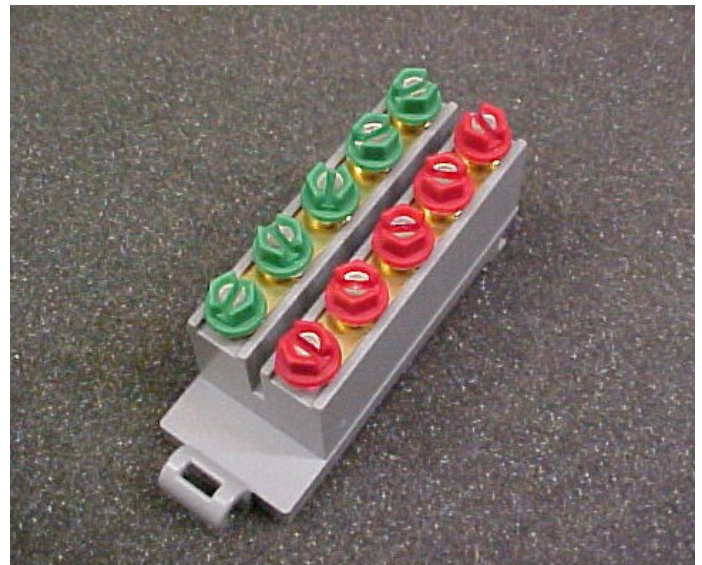

6010-15: All tips connected / all rings connected (standard)

6010-05: No tips/rings connected

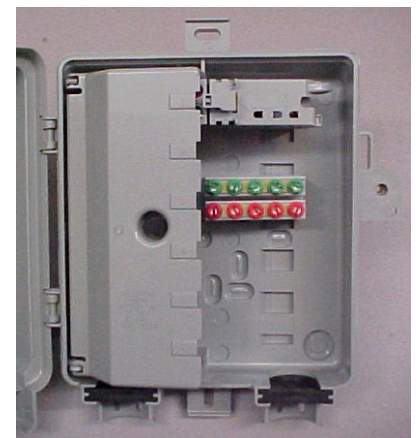

6010-12: Two tips/rings connected, three tips/rings unconnected

6010-24: Two pairs of tips/rings connected, one stand alone tip/ring

6010-32: Two tips/rings connected, three tips/rings connected

6010-15
