LAP SIDING SPACER

Description

The **PL-63500 Lap Siding Spacer** is used behind the mounting feet on any equipment being installed on standard lap siding and prevents mounting feet from being suspended in space or deformed when mounting screws are tightened. The spacer can be used as is, or trimmed as needed using a pair of side cutters. Leaves a professional looking installation with solidly mounted equipment.

Specifications

- Packaged 20 per carton
- Tough ABS plastic
- .010" to .500" thickness
- .300" screw clearance holes
- Use as is or cut to fit

Dimensions

5.50" x 1.50" x .010-.500"
