## TECHNICAL DATA

### Model 3500

6 Line Interface Enclosure

#### Description

The TDI Model 3500 series Communications Interface is a six line capable unit that utilizes all industry standard station protectors. It is configured for quick installation with easy upgrade features. No need to remove ground wire when adding additional protection.

#### Features

- Order in any number of configurations from 1 to 6 pair.
- Easily field upgradeable to higher pair count.
- Color coded screw terminals
- Tough UV stabilized polymer housing
- Security plate with telco over-ride provision
- Add on capability for the 6020-15 Homerunner II block, no need for additional enclosures. Tie down up to 15 additional wire pairs.
- Packaged in master cartons of 20 units
- 3 pre-slit grommet ports for easy access.

#### Product Matrix

Can be ordered with any combination of pair count, protector type, and other options. Please call TDI for details.
