TECHNICAL DATA

Homerunner II® Model 6025-15

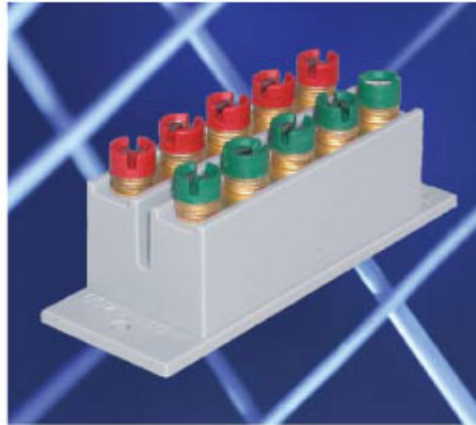

for Corning® 7600 type NID's

Description

The TDI model 6025-15 is a multi-pair connection block which allows as many as fifteen home run pairs to be connected to a single incoming wire pair. Fits the Corning® 7600 series NID's. These blocks can also be used as stand alone termination blocks when mounted to an interior surface apart from the NID.

Features

- Color coded screw terminals
- Each screw will accommodate up to three wires
- Molded from tough 94V-0 ABS
- Easily connected in multiples for high pair count termination
- Simple to install
- Packaged in cartons of 10 units

6025-15

Configurations

This product can be supplied with a number of different continuity configurations. The standard unit uses a brass buss bar to connect all the tip screws and all the ring screws.
