

# TDI

## TECHNICAL DATA

### Model 6500 Piggyback® Fiber Storage Enclosure

The **TDI Model 6500 Piggyback®** FTTP Storage Enclosure is designed to provide secure storage for FO cable on installations where FO usage is planned for the future. To meet the requirements of many customers to keep the number of enclosures on the building to a minimum, this enclosure is designed to allow your current Network Interface product to attach directly to the cover.

The 6500 will accommodate most current NID enclosures by TDI, Corning, Keptel, Bourns, and others. Stainless NID mounting screws included.

**Order Part Number: 6500-00-1**
